

Musculoskeletal Disorders (MSD) Awareness and Prevention

This fall, the Ministry of Labour will be conducting a heightened enforcement campaign (a.k.a. blitz) on musculoskeletal disorders. During inspector visits to organizations, MSD prevention programs will be viewed. Attend this workshop to prepare for these visits.

Musculoskeletal disorders (MSD) result from excessive strain on the body and are the number one workplace injury in the province of Ontario, costing billions of dollars. With knowledge and a participatory approach, your organization can prevent these injuries from occurring.

Attend this full day workshop to:

- *Learn about the major risks that lead to MSD and common control strategies*
- *Understand the value of the participatory approach, where workers are involved in the recognition, assess and control of risks*
- *Learn the steps to developing a comprehensive MSD prevention program for your workplace*
- *Introduce tools to help you develop your program*
